

Shark Attacks in Australia From 1791-2020

New South Wales has recorded the highest number of shark incidents, with 371 cases.

Queensland has the second highest number of recorded shark incidents, with 104 cases.

New South Wales (NSW) is home to the largest population and has a high number of recorded shark incidents. In the past 10 years, NSW has recorded 371 shark incidents.

Which month has the highest number of shark attacks?

Shark attacks are most frequent during summer and autumn. However, it is important to note that water activities and more people engage in activities like swimming, surfing, and diving, increasing the chances of encounters. In contrast, during the winter months, fewer people are in the water, leading to a decline in shark attacks.
